

**Email (Redacted) from David Russell [Applicant] dated 23/09/15**

Dear Darren,

The response from Transportation states that the existing passing place some 400m to the north west of the site is not a formal passing place and is unsurfaced. This is incorrect, the passing place is surfaced and has a proper council supplied sign. If you need proof, I can supply photographs.

Regards,

David Russell

Hi Darren,

The grounds for our appeal against the need for a passing place are based on the fact that a proper surfaced passing place already exists and the road is completely straight negating the need for an extra passing place between the existing one and the junction.

Regards,

David Russell
