# Introduction / Background to Application

These grounds for review of a decision to refuse planning consent for a house site named North Wardend which is located at Birnie, near Elgin are submitted under section 43A of the Town and Country Planning (Scotland) Act 1997 (as amended). This notice of review has been lodged within the prescribed three month period from the refusal of planning permission dated 3 November 2015.

## **The Council's reason(s) for this decision are as follows -**

The proposal is contrary to Moray Local Development Plan policies H7, PP3, and IMP1 for the following reasons :

- Ten house plots have been approved within this woodland which is in an area of significant build-up as identified in the Housing in the Countryside Supplementary Planning Guidance and the introduction of a further house in this location would result in an unacceptable build-up of housing that would irreversibly change the rural character of the area. Despite the screening afforded by established trees the cumulative impact of these proposals would alter the appearance of the area through the increased visibility of built development and through associated activity ie increased traffic movements, refuse bin collections etc which in turn would erode it's rural character;
- The site lacks sufficiently established boundaries to distinguish the site from the surrounding landscape
- The proposal would undermine the rural character of the area and would not help to create a place with character and identity.
- The development would undermine the rural character of the area cannot be effectively integrated into the surrounding landscape.

**The report confirms that there were no technical objections to the proposal from any of the following statutory consultees - Environmental Health, Contaminated Land and Transportation**

# The Proposal

The proposal is for a single dwelling-house accessed from an existing access track which connects to the U119E.

If approved, the site would be served by a private water supply and private drainage system.

Careful consideration has been given to the individual house layout / fenestration / detail and the resultant design is one of a contemporary style with traditional characteristics including vertically proportioned windows, gables with 40 - 45 degree pitches, gable widths no larger than 2.5 times the ground to eaves height, well placed velux rooflights doubled up in many instances to accentuate traditional openings and a general fenestration in keeping with a traditional cottage appearance. In terms of material use, the walls will be finished with white or cream roughcast and natural stone with grey concrete tiles specified to the roof to imitate traditional natural slates.

The proposed house will sit comfortably on the level site.

At present, the proposed site is populated with mature trees. Various numbers of these trees will be felled to form appropriate space for the construction of the dwelling-house and associated works however sufficient trees will be retained to ensure a minimum of 25% of foliage / site cover will exist in accordance with planning guidelines (NORTH-WARDEND / PLANNING / 01).

# The Site

Photo of site (from south corner)

Aerial image of site

The proposed site is situated near Birnie and is approximately 5 miles from Elgin. It is located off an existing access track which connects to the U119E.

The topography of the site is such that it is generally flat.

The site will be defined and bounded by at least 50% of existing boundaries which consists of existing mature trees together with an existing defined track along the south west and south east boundaries.

# Planning Policies

- Moray Local Plan 2015  
The Local Plan assumes in favour of an application for a new house in the countryside provided certain criteria are met.
- Policy H7 sets out requirements on the siting and design of new houses in the open Countryside which;
  - a) reflect the traditional pattern of settlement in the locality and are sensitively integrated with the surrounding landform using natural backdrops, particularly where the site is clearly visible in the landscape. Obtrusive development (i.e. on a skyline, artificially elevated ground or in open settings such as the central area of a field) is not acceptable;
  - b) do not detract from the character or setting of existing buildings or their surrounding area when added to an existing grouping or create inappropriate ribbon development;
  - c) do not contribute to a build-up of development where the number of houses has the effect of changing the rural character of the area. Particular attention will be given to proposals in the open countryside where there has been a significant growth in the number of new house applications; and,
  - d) have at least 50% of the site boundaries as long established and are capable of distinguishing the site from surrounding land (e.g. dykes, hedgerows, fences, watercourses, woodlands, tracks and roadways).
- As regards design policy H7 also requires;
  - a roof pitch of between 40 and 45 degrees, a gable width no more than 2.5 times the height of the wall from ground to eaves, uniform external finishes including slate or slate effect roof tiles, a vertical emphasis and uniformity to windows, additional planting and boundaries sympathetic to the area.

# Main Issues answered in terms of planning policy (part A)

Having set out the policy background we would like to now consider the main issues that arise from the proposal in relation to this policy context. The main issues are considered to be ;

- Principle of the site
- Design
- Infrastructure and servicing
- Loss of Woodland

## • PRINCIPAL OF THE SITE

The Moray Local Plan in line with National Planning Policy is committed to the principle of well sited and designed new housing in the countryside.

Policy H7 (New Housing in the Open Countryside) is the predominant policy in terms of the acceptability of a new house in the countryside and states that new development should be "easily absorbed" into the landscape and should be "low impact and reflect the character of the surrounding area in terms of the traditional pattern of settlement."

The application is for a single house and is in accordance with the main thrust of this policy.

There are four specific criteria under the heading "siting" which have to be met for the principle of a site to be acceptable.

- In the first instance the house must reflect the traditional pattern of settlement in the locality and must be sensitively integrated with the surrounding landform using natural backdrops, particularly where the site is clearly visible in the landscape. Obtrusive development (ie. on a skyline, artificially elevated ground or in open settings such as the central area of field) will not be acceptable.

The first of the siting criteria within Policy H7 concerns the dwelling not be overtly prominent. Examples of overtly prominent locations given are sites on a skyline, on artificially elevated ground, or in open settings such as the centre of fields. The site is not on artificially elevated ground and is not in the centre of a field. In fact the dwelling-house, if approved, would have a mature tree lined backdrop behind it which would help it to integrate with the housing pattern here. Please see the photomontage below which denotes how the dwelling may look when complete.

# Main Issues answered in terms of planning policy (part B)

- Secondly, it must not detract from the character or setting of existing buildings or the surrounding area when added to an existing grouping or create inappropriate ribbon development.

The prevailing pattern of settlement within this part of the countryside is characterised by both small clusters of housing and individual houses nestled among existing, mature and semi-mature tree growth. This house plot would be situated deep into the existing woodland away from the large cluster of dwellings to the north. In our opinion we feel that when viewed onsite and from the aerial map to the right the plot would well placed here to blend in with the settlement pattern. Further, if approved, the proposal would be concealed from the nearby tracks and public roads. Also, we feel the dwelling would not detract in any way from the character of the Wardend area when taking into account the number of properties which exist nearby.

- Thirdly, it does not contribute to a build-up of development where the number of houses has the effect of changing the rural character of the area. Particular attention will be given to proposals in the open countryside where there has been a significant growth in the number of new house applications.

Similarly to the above point we feel that the proposal would integrate very well to this area as a stand-alone plot nestled within existing mature tree growth which would help to conceal it from any public roads and ensuring the character of the area is not changed.

- Lastly, Policy H7 states that the site should have 50% of it's boundaries as long established.

The site would be defined and bounded by at least 50% existing boundaries. These boundaries would consist of existing mature trees together with an existing defined track along the south west and south east boundaries.

## ● DESIGN

There are a series of specific design requirements within policy H7.

They are all met by the proposal as follows -

a roof pitch of between 40-55 degrees, gable widths of no more than 2.5 times the height from ground to eaves level, uniform finishes, a vertical emphasis to the fenestration, existing planting within the plot and boundaries sympathetic to the area.

## ● INFRASTRUCTURE AND SERVICING

Access, parking and drainage are all salient factors pertaining to this application and ones which can be accommodated.

## ● LOSS OF WOODLAND

We would be more than willing to carry out the required area of compensatory planting elsewhere in Moray on land that we own for this proposal.

# Reasons for Refusal and our justification

- **MORAY COUNCIL REASONS FOR REFUSAL -**

The proposal is contrary to Moray Local Development Plan policies H7, PP3, and IMP1 for the following reasons :

- Ten house plots have been approved within this woodland which is in an area of significant build-up as identified in the Housing in the Countryside Supplementary Planning Guidance and the introduction of a further house in this location would result in an unacceptable build-up of housing that would irreversibly change the rural character of the area. Despite the screening afforded by established trees the cumulative impact of these proposals would alter the appearance of the area through the increased visibility of built development and through associated activity ie increased traffic movements, refuse bin collections etc which in turn would erode it's rural character;
- The site lacks sufficiently established boundaries to distinguish the site from the surrounding landscape.
- The proposal would undermine the rural character of the area and would not help to create a place with character and identity.
- The development would undermine the rural character of the area cannot be effectively integrated into the surrounding landscape.

**In response to the above we are keen to articulate our reasons why we feel this proposal would be acceptable. Please see below. –**

- **THE PROPOSAL FITS IN WITH THE EXISTING SETTLEMENT PATTERN**

The council state that "ten house plots have been approved within this woodland which is in an area of significant build-up as identified in the Housing in the Countryside Supplementary Planning Guidance.....and would result in an unacceptable build-up of housing that would irreversibly change the rural character of the area." While it's true that the introduction of this proposal would constitute another unit within the Wardend area we strongly feel that no detrimental impact would be felt and certainly no irreversible change to the rural character of the area would occur. The existing houses and consented plots either form part of a small cluster of dwellings or are stand-alone properties. This proposal has been designed as a stand alone dwelling concealed by woodland to ensure that it integrates with the existing settlement pattern and the large wooded area here and that it is effectively hidden by tree screening and will cause minimum traffic movement. Please see aerial view on page 6.

- **LARGE BACKDROP OF EXISTING MATURE TREES WILL HELP TO INTEGRATE HOUSE**

A large backdrop of existing mature trees exists which will ensure the proposal blends in to the landscape. Please see montage below denoting how the proposal may look when complete.

- **ADEQUATE BOUNDARIES EXIST TO DEFINE SITE**

The site will be defined and bounded by at least 50% of existing boundaries which consists of existing mature trees together with an existing defined track along the south west and south east boundaries.

- **NO TECHNICAL OBJECTIONS FROM STATUTORY CONSULTEES**

There were no objections from any of the statutory consultees to the application therefore no technical issues exist.

- **WILLINGNESS TO CARRY OUT COMPENSATORY PLANTING**

We would be more than willing to carry out the required area of compensatory planting elsewhere in Moray on land that we own for this proposal.

# Conclusion

We very much hope that we have demonstrated how the proposed dwelling-house is acceptable under the criteria set out in the relevant local plan policies.

There were no technical objections to the proposal from any of the statutory consultees.

The reasons for refusal suggest that the proposal would lead to a development that would detract from the character of this part of the countryside however we feel that when the proposal is considered within the overall context of the nearby houses and plots it will integrate well as a stand-alone property reflective of the existing rural settlement pattern.

The design of the house meets the specific design requirements of the relevant local plan policy H7. It is also consistent with the criteria for an acceptable scale of house in the area.

From a development feasibility aspect, recent experience has informed us that there is now a high demand and need for rural accommodation, in the Moray area. Indeed, the vast majority of sites we sell are to local people and we feel it is very important to help meet this demand in order to retain skills and jobs in the area. This not only helps the local economy but also has a “knock on” effect in terms of local services, schools, shops and the wider economy as well. Further, in our view what cannot be underestimated after the recent financial downturn is the need for valuable work for local tradesmen and building merchants etc. We feel that there appears to be nothing to prevent the merits of the application allowing it to progress to approval. Should any unforeseen material consideration arise during determination, please advise us accordingly in order that remedial action and an appropriate response may be pursued. We respectfully ask that the appointed LRB panel approves this application.

Yours sincerely,
