

## 9. DETERMINING LOCALITIES

*Information may be obtained from a number of stakeholders, such as the relevant health and/or social care body who may be able to provide, amongst other things, data on alcohol related mortality and hospital admissions. The chief constable may be able to identify problematic areas where it can be demonstrated that crime, disorder and nuisance are caused by customers of a particular concentration of licensed premises and/or suggest areas in which the number of licensed premises or premises of a particular description are potentially approaching overprovision.*

*7.11 It is not necessary to divide the whole of the Licensing Board's area into separate localities. A locality could, for example, consist of a particular town, a city centre, a street, a collection of streets, a council ward, datazone(s) – (Scottish Index of Multiple Deprivation) or the whole of the Licensing Board's area.*

Suggest linking policy to particular intermediate zones with higher levels of alcohol-related problems?
