It has services in close proximity and is designated in the Local Development Plan for residential development.

Any party wishing to submit an offer should first note their interest. Full instructions on submitting an offer will subsequently be issued only to parties who have noted interest.

Location/Description

The site extends to approximately 1.69 hectares (4.18 acres) and is shown indicatively on the attached plan.

Services

Mains electricity, gas, water and sewerage are understood to be located in close proximity to the site. Indicative drawings of utilities are provided via this [link](#), but purchasers should satisfy themselves as to the location, condition and suitability of all service supplies.

Contaminated Land

The Council's Environmental Health Section has advised that there is no record of contaminative uses on this site. An electricity substation borders the site to the southeast and first appeared on the Ordnance Survey map in 1972. The site is downgradient of the substation and contaminants could move in groundwater from the substation onto the site. However, although the substation site is quite large, the infrastructure is of low density. Contaminants associated with substations are typically limited to transformer oils and oil additives, which are not greatly mobile in the environment. Given the limited quantity of oils likely to have been used, it is considered that the risk of contamination of the Council's site by the substation would be low.

Planning

The site is designated as OPP 1 in the Moray Development Plan as suitable for community uses, business, industrial, residential or for a cemetery. It is designated as R2 in the Proposed new Local Development Plan with a guide that it is suitable for 35 residential units. More detailed planning guidance in terms of the Proposed new Local Development Plan is provided via this link <http://www.moray.gov.uk/downloads/file123069.pdf>
