

Climate Change Strategy 2020 -2030 Moray Council

Community Planning Partnership

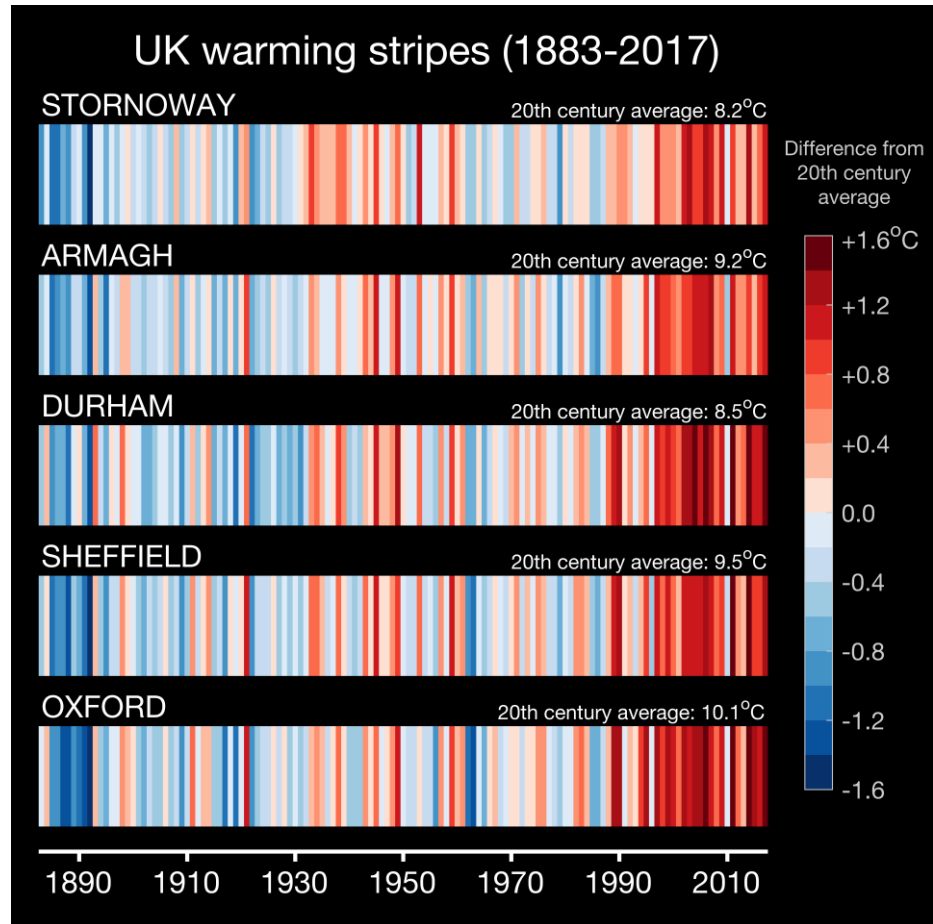

moray
council

Background Evidence

There is a global climate emergency

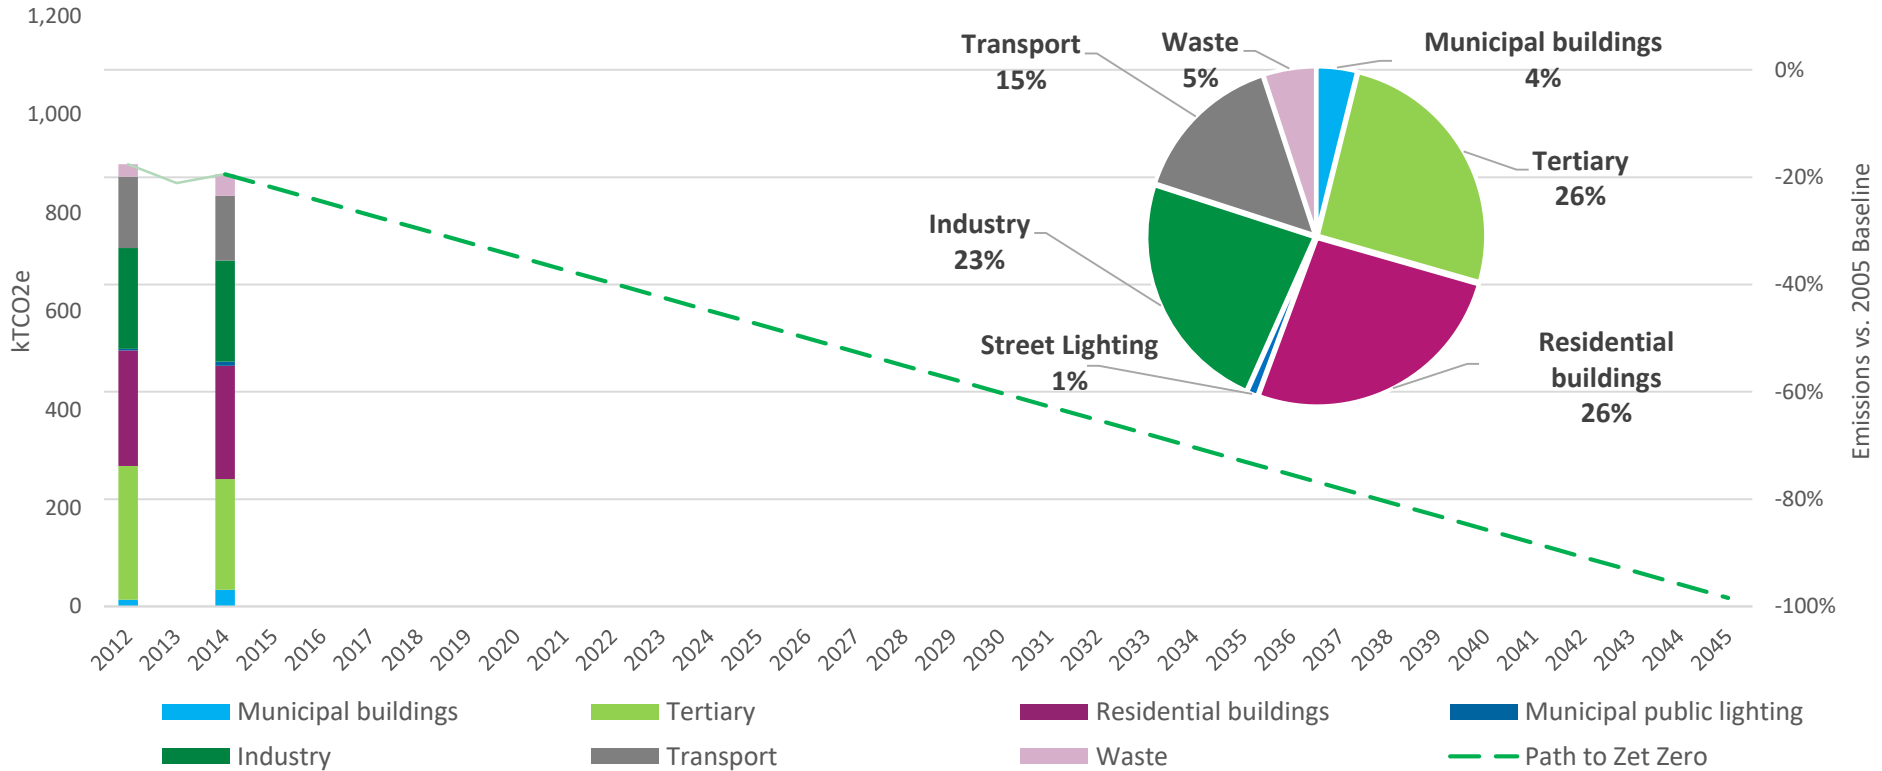

The evidence is irrefutable

The science is clear

Background Route to Net Zero

Moray Area Emissions SG Target of net zero carbon emissions by 2045

Strategy Vision

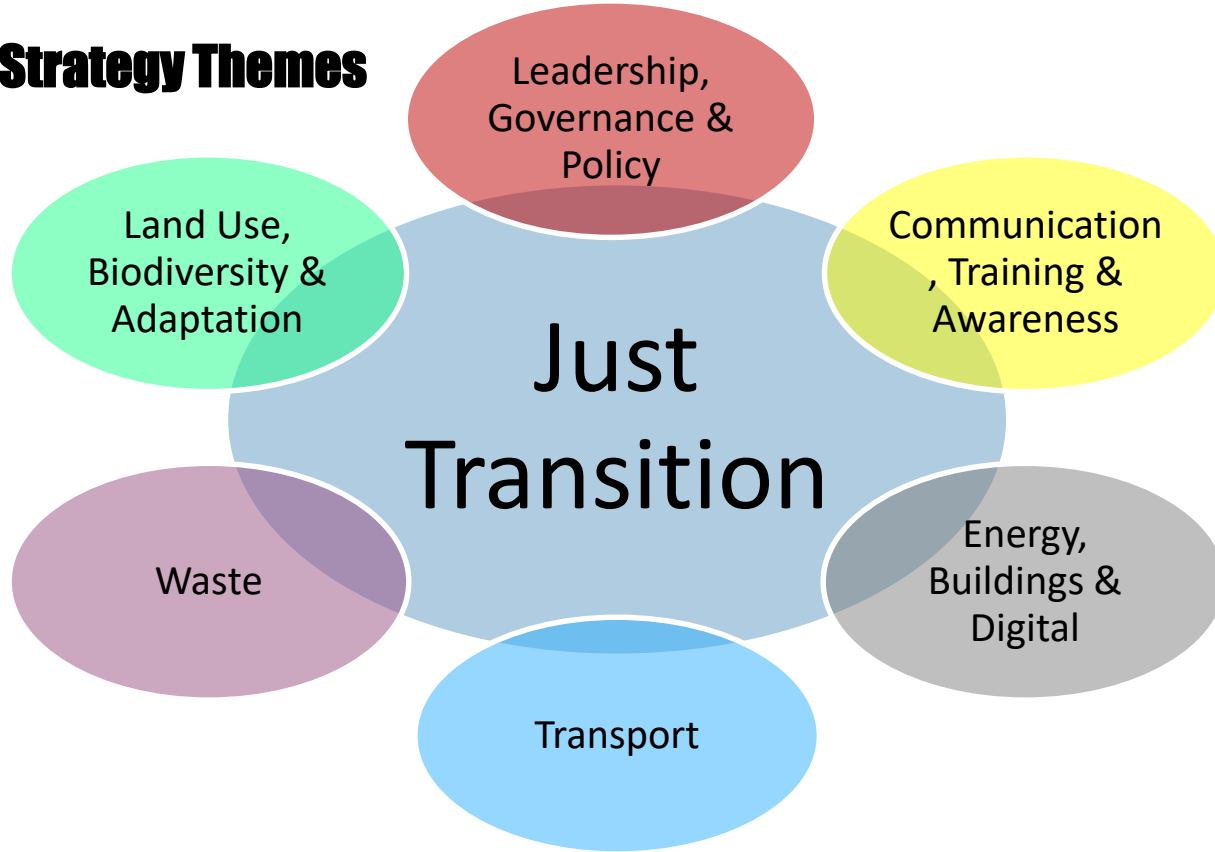

Vision Statement

A resource efficient, carbon neutral council that works with partners to mitigate the worst effects of Climate Change to create a resilient, biodiverse, fair and more sustainable future for everyone within Moray

Selected Aims

- Supporting a just transition to a low carbon economy
- A carbon neutral Council by 2030 with an ongoing reduction in emissions from the Council area as a whole
- Ensure the Council, and its partners, are better prepared to deal with the current and future impacts/consequences of climate change
- Work to retain, protect and enhance biodiversity across Moray
- Ensure the climate change considerations are integrated into Council decision-making processes
- Seek to have the strategy endorsed by the community partners with commitments to joint action where possible
