

Digital inclusion is ensuring that all people, regardless of their circumstances, have equitable access to and the skills to use digital technologies safely and effectively. This involves providing access to devices and affordable internet, developing digital literacy, and designing accessible services so everyone can participate in the digital world for benefits like education, employment, and healthcare.

### Moray Community Digital Buddies

We have teamed up with Digital Unite to offer the opportunity for Community Organisations to build up their staff or volunteers as Digital Champions (Buddies), while also offering the opportunity to improve digital access.

Digital Buddies offer support in local communities, including guiding people through the online forms, troubleshooting any technical issues they might encounter with devices, and providing general digital literacy support.

To contact a Digital Buddy, drop into one of the hubs during opening hours or contact them directly to arrange a suitable time.
