

## Appendix C

### STAG Appraisal Summary Tables (ASTs)

Southern Distributor Route and Morrison Road Link (Option G)			
Name and address of authority or organisation promoting the proposal: (Also provide name of any subsidiary organisations also involved in promoting the proposal)		Moray Council High Street Elgin Moray IV30 1BX	
Proposal Name:	Southern distributor route and Option B.	Name of Planner:	The Moray Council
Proposal Description:	This option combines Option B with upgrading a route following Reiket Lane through to Glen Moray to form a southern distributor route.	Estimated Total Public Sector Funding Requirement:	Capital costs/grant £47.4m (2007 prices) inclusive of an inflation factor, and optimism bias and risk allowances which combined account for 47% of the estimated costs.
			Annual revenue support
			Present Value of Cost to Govt. £45.0m
Funding Sought From: (if applicable)	Capital funds from the public and private sector, The Moray Council, HITRANS and Scottish Executive, and developer contributions.	Amount of Application:	To be confirmed.
Background Information			
Geographic Context:	Elgin is the principal administrative and commercial centre of Moray with the most recent figures (2001 Census) revealing a population of almost 21,000. The town has a wider catchment population of close to 100,000. It is evident that transport plays an important economic and social function within the context of Elgin.		

<p>Social Context:</p>	<p>This option combines a new link road between Edgar Road and Morriston Road to an upgraded route through Reiket Lane and Glen Moray Drive to form a southern distributor route. This option will promote improved access to the Edgar Road Retail Zone. It will also draw traffic from West Road travelling through to central Elgin along Main Street. This will improve access to Dr Gray’s hospital and to the centre of Elgin where a range of public, education and leisure services are located.</p> <p>No Community Regeneration Area, or European Structural Fund areas will be affected by this option.</p>
<p>Economic Context:</p>	<p>The aim of this option is to impact positively on local transport conditions within Elgin. Elgin has two main access roads the A96 and A941 that allow travellers to move through and in and around the area. These connect surrounding communities to the centre of Elgin, to key employment sites and provide access to a range of public services and recreational opportunities.</p> <p>Elgin is the commercial centre of the wider Moray area providing a focus for employment and commercial activity. The service sector dominates the Moray economy with 75% of employees jobs in service sector occupations. Widespread deprivation is not a significant factor within Elgin, although at the small area level particularly at the datazone level a certain degree of social and economic weaknesses exist.</p> <p>The rate of unemployment in Elgin is marginally higher than the Moray average with figures from the Scottish Executive’s February Economic Profile showing that two of the five wards within Moray with the highest rate of unemployment were located in Elgin (Cathedral 3.5%, New Elgin 2.9%). An analysis of travel to work patterns shows the dominance of the private car with 51% of households having access to at least one car. The average distance travelled to work in Elgin according to the Census of Population in 2001 was 14km.</p> <p>The development context within Elgin is largely positive with demand for housing relatively strong and commercial developments also positive. Key aims of the local plan include identifying sites for 950 houses for Elgin and to identify within Elgin sites for industrial/commercial development.</p>

Planning Objectives	
Objective:	Performance against planning objective:
<p>Key Planning Objective</p> <ul style="list-style-type: none"> <li>▪ To provide a quicker, safer and more reliable transport system in and around Elgin while accommodating future development.</li> </ul> <p>Sub Objectives</p> <ul style="list-style-type: none"> <li>▪ To reduce average junction delay times by introducing junction time improvements on the A96 and A941 for traffic egressing and accessing key junctions from the base year scenario;</li> <li>▪ To minimise delay and disruption to all mode users caused by the conflict of modes on key routes in and around Elgin;</li> <li>▪ To improve safety for all road users by reducing the number of road accidents in and around Elgin;</li> <li>▪ To improve the management of parking in Elgin;</li> <li>▪ To encourage modal shift from private car to public transport, cycling and walking;</li> <li>▪ To mitigate the risks of adverse environmental impacts caused by motorised vehicular traffic in and around Elgin;</li> <li>▪ To ensure integration of land use and transport.</li> </ul>	<ul style="list-style-type: none"> <li>▪ Yes – model results show that this option will improve journey times and ease congestion within Elgin. Although the option will increase road-space in Elgin there will negligible impacts on safety and security. The option complements the wider development context in Elgin.</li> <li>▪ Yes – model results shows improvements at key junctions when compared to the do-minimum scenario.</li> <li>▪ Yes – model results show improvements to average vehicle speed. This will benefit all road-users.</li> <li>▪ It is estimated that the impacts on accident levels will be neutral, despite increasing road-space within Elgin.</li> <li>▪ No - The STAG Part 1 Appraisal recommended a parking strategy for Elgin be developed.</li> <li>▪ No – This option will not impact directly on the provision of improved public transport services. Any modal shift impacts through reductions in congestion will be minor.</li> <li>▪ Yes – This option will improve traffic flow and reduce congestion in Elgin and impact positively on emissions levels.</li> <li>▪ Yes - This option complements existing land-use policies in Elgin and Moray.</li> </ul>
Rationale for Selection or Rejection of Proposal:	In accordance with STAG process and consistent with Planning Objectives.

<b>Implementability Appraisal</b>			
Technical:	As with all of the options, there are no specific unusual technical aspects identified at this stage.		
Operational:	There are no factors which might adversely affect the ability to operate the proposal over its projected life without additional costs.		
Financial:	The funding mechanism has not been completed as part of this STAG Part 2 Appraisal. The estimated capital cost of this option is £47.4m (2007 prices) inclusive of an inflation factor, and optimism bias and risk allowances which combined account for 47% of the estimated costs.		
Public:	The STAG Part 2 Appraisal of this option follows on from a Pre-Appraisal and STAG Part 1 Appraisal that encouraged a wide range of views from local stakeholders in Elgin and Moray.		
<b>Environment</b>			
Mitigation Options Included: (Costs & Benefits)	An Environmental Report has been produced to accompany this STAG Part 2 report. The Environmental Report outlines a number of potential mitigation measures that could be implemented for this option. Mitigation measures will require further exploration as the route design develops.		
<b>Sub-objective</b>	<b>Qualitative Information</b>	<b>Quantitative Information</b>	<b>Significance of Impact</b>
Noise and Vibration	1 property on the link between Pluscarden Road and Edgar Road would receive an increase in noise level of 9.7dB, and 1 property on the link between A96 and Pluscarden Road would receive an increase in noise level of 5.7dB. The information generated by a Stage 2 assessment is not sufficiently detailed to specify mitigation measures. However, there are a number of measures available	Moderate Negative	Moderate Negative

	that could be considered as the route design develops. These measures would include: roadside noise barriers, low noise surfacing or speed restrictions.		
Air Quality - Overall	Air Quality standards in Elgin are much higher than the Scottish average. This option maintains the positive Air Quality levels within Elgin.	Minor to Moderate Positive	Minor to Moderate Positive
CO <sub>2</sub> - Global	CO <sub>2</sub> levels in Elgin are much lower than the national average. This option maintains the positive CO <sub>2</sub> levels within Elgin.	Moderate Positive	Moderate Positive
PM <sub>10</sub> - Local	PM <sub>10</sub> levels in Elgin compare favourably to national average rates. This option has a neutral impact on PM <sub>10</sub> levels within Elgin.	Neutral	Neutral
NO <sub>2</sub> - Local	NO <sub>2</sub> levels in Elgin compare favourably to national average rates. This option has a minor positive impact on NO <sub>2</sub> levels within Elgin.	Minor Positive	Minor Positive
Water Quality, Drainage and Flood Defence	There are 3 watercourses to cross and all are the A2 quality River Lossie and classified Salmonid water. A significant proportion of this option is identified within the floodplain which is close to the urban area.	Minor Negative	Minor Negative.
Geology	Little or no impact.	Neutral	Neutral

Biodiversity	The Wards Wildlife site and Dunkinty Woodland will both be impacted by this option. Following mitigation there will be minor negative impacts.	Minor Negative	Minor Negative.
Visual Amenity	Sensitive visual receptors in the vicinity of this option include: Bruceland farm, Bruceland House, Sunningdale, Allarburn Cottages, Greenacres, Norriston Cottages, Saltire Lodge, Dunedin Haughland, Heldon View, Edgar Road residential properties, Bardon Place properties, Glen Moray Drive properties, Sandy Road properties, Birnie Road properties, Thornhill Road properties, Reiket Land properties, The Wards, River Lossie riverside footpath, High School Playing fields, The Grove (listed), Greenwards Primary School, Riverside Caravan Park and The Magic Roundabout Childcare Centre.	Minor Negative	Minor Negative
Agriculture and Soils	The Morrision Road section moves through agriculture land but has a relatively small total land-take. Although severing 14 fields following mitigation impacts are likely to be neutral to minor negative.	Neutral to Minor Negative	Neutral to Minor Negative
Cultural Heritage	Little or no impact	Minor Beneficial	Minor Beneficial

Landscape	3 river crossings, 1 railway crossing, 2700m of new highway required.	Minor Negative	Minor Negative
-----------	---	----------------	----------------

Safety			
Sub-objective	Item	Qualitative Information	Quantitative Information
Accidents	Change in Annual Personal Injury Accidents	The estimated change in vehicle kilometres of vehicles on the highway network was calculated to be less than 1% when this scheme option was modelled together against the do-minimum scenario. Therefore, the change in the occurrence of accidents/personal injury accidents was calculated to be negligible.	Not applicable
	Change in Balance of Severity	Not applicable	Not applicable
	Total Discounted Savings	Not applicable	£0
Security		This option will not impact directly on improving public transport services. There will therefore be minimal impact on the security of users of public transport. Improving the road network introduces improved materials, signage and lighting which can produce positive security impacts.	Not applicable

Economy (Transport Economic Efficiency) (2002 discounted prices)			
Sub-objective	Item	Qualitative Information	Quantitative Information
User Benefits	Travel Time	Journey time savings resulting from the introduction of this option are delivered to consumers and business sector. (Consumer £13.0m, Business £7.3m)	£20.3m
	User Charges	There will be no impact on user charges.	£0
	Vehicle Operating Costs	Net change in vehicle operating costs will largely be derived from changes to vehicle speed. (Consumers £0.9m, Business £0.3m)	£1.2m
	Quality / Reliability Benefits	This option will improve journey time reliability.	N/A
	Carbon Benefits	This option will produce marginal carbon benefits.	£0.10m
Private Sector Operator Impacts	Investment Costs	This option will not impact on private sector investment costs.	£0
	Operating & Maintenance Costs	This option will have a marginal impact on operating and maintenance costs.	-£0.22m
	Revenues	This option will not impact on private sector revenues,	£0
	Grant/Subsidy payments	This option will be part funded by developer contributions.	-£0.96m

<b>Economy (Economic Activity and Location Impacts)</b>			
<b>Sub-objective</b>	<b>Item</b>	<b>Qualitative Information</b>	<b>Quantitative Information</b>
Economic Activity and Location Impacts	Local Economic Impacts	Not applicable	Not applicable
	National Economic Impacts	Not applicable	Not applicable
	Distributional Impacts	Not applicable	Not applicable

<b>Integration</b>			
<b>Sub-objective</b>	<b>Item</b>	<b>Qualitative Information</b>	<b>Quantitative Information</b>
Transport Interchanges	Services & Ticketing	This option will not impact directly on improved public transport services.	Not applicable.
	Infrastructure & Information	This option promotes improved journey times for all vehicles (public and private) moving through and around the Elgin area.	Not applicable.
Land-use Transport Integration		This option complements land-use policies in Moray and Elgin. This includes the Moray Structure Plan and the current and emerging Moray Local Plan.	Not applicable.
Policy Integration		This option is consistent with the Moray Local Transport Strategy (2001) and the HITRANS Regional Transport Strategy. This option contributes to, and is consistent with, a range of government policies, including the 2004 Transport White Paper and the recently published National Transport Strategy.	Not applicable.

<b>Accessibility &amp; Social Inclusion</b>			
<b>Sub-objective</b>	<b>Item</b>	<b>Qualitative Information</b>	<b>Quantitative Information</b>
Community Accessibility	Public Transport Network Coverage	This option will not directly impact on public transport network coverage. The main beneficiaries will be car owners. However, those travelling by public transport, in the main by local buses (326, 327, 328, 329, 331 and 336) will also experience improved accessibility as traffic flow improves and congestion eases. The establishment of new road space will also provide opportunities to review existing bus routes and promote new bus services. The journey time savings are outlined in the Economy section of this report.	Not applicable.
	Access to Other Local Services	This option will promote improved access to the centre of Elgin, which is the commercial focus for Elgin and the Moray Area. This will improve access to key employment sites and a range of community services.	Not applicable.
Comparative Accessibility	Distribution/Spatial Impacts by Social Group	Levels of social exclusion in Elgin are relatively low. As the main beneficiaries will be existing car owners it is likely that any social inclusion impacts will be modest.	Not applicable.

Distribution/Spatial Impacts by Area	This option will promote improved access within and through Elgin. Improvements to the local transport network are viewed as vital for the future economic development of Elgin and the wider Moray area. A number of wards and datazones within Elgin exhibit relative measures of geographic and employment deprivation.	Not applicable.
--------------------------------------	--	-----------------

<b>Cost to Public Sector (2002 discounted prices)</b>		
<b>Item</b>	<b>Qualitative information</b>	<b>Quantitative information</b>
Public Sector Investment Costs	£47.4m (2007 prices) inclusive of optimism bias.	£44.3m (present value)
Public Sector Operating & Maintenance Costs	This option will impact on operating and maintenance costs	£1.0m
Grant/Subsidy Payments	Developer contributions will part finance this option.	-£0.96m
Revenues	There will be no impact on revenues	£0
Taxation impacts	Loss of fuel duty	£0.71m
<b>Monetised Summary (2002 discounted prices)</b>		
Present Value of Transport Benefits	£20.3m	
Present Value of Cost to Government	£45.0m	
Net Present Value	-£24.7m	
Benefit-Cost to Government Ratio	0.45:1
