

List of Approved Certifiers

(to be read in conjunction with Information Leaflet 5)

Infiltration Systems Serving Septic Tanks

Ground investigations and tests to determine the suitability of ground for the discharge of effluent from septic tanks may only be carried out by a company or individual approved by the Moray Council. The listing of Approved Certifiers has been considered necessary due to the level of experience which is required to evaluate ground conditions, interpret results obtained from percolation tests and to design an infiltration system. Each company or individual contained within the list below has demonstrated evidence of qualification, experience and the holding of appropriate professional indemnity insurance and is therefore acceptable to undertake ground assessments for the purposes of obtaining Building Warrant approval within Moray.
