

Recycling Centres

Recycling waste means using waste materials to manufacture other products of an identical or similar nature.

Recycling Centres are large facilities where a wide variety of recyclates (materials that can be recycled) can be taken. The recyclates are sorted in the centre before being sent for reprocessing.

WHO

Recycling Centres have been provided to allow **YOU** to recycle more of **YOUR** waste.

WHAT

You can take the following recyclates to your local **RECYCLING CENTRE**

- Food and drinks cans

- Car batteries

- Garden waste

- Glass bottles and jars

- Plastic bottles

- Paper and cardboard

- Rubble

- Scrap metal

- Textiles

- Used engine oil

- White goods

- Wood

- WEE (waste electrical and electronic equipment)

Only **domestic** refuse is accepted, either as a small trailer or car boot load of materials.

If you are having work carried out by a contractor remember the cost of any work should include the removal of any building materials.

HOW

Below is a list of all the Recycling Centres in your area and WHAT you can take there.
