and Social Care Partnership**

Home from Hospital Team

You have been assessed as needing support from the Home from Hospital Team following your discharge from hospital.

The Home from Hospital Team is a small team of home carers who will help you while you are recovering from your stay in hospital.

The team will continue to assess your needs and adjust your care to meet those needs. This will mean that the support you receive may be reduced or increased over the period of time that the team visit you.

A Community Care Officer from the Moray Council will also visit you to discuss the team's input and plan any continuing home care needs that you may have.

There is no cost to you, your relatives or carers for care provided by the Home from Hospital Team.

(However there may be a charge for any home care you require after the team's involvement with you comes to an end).

If you, your relatives or carers have any questions about care following your hospital admission, please speak to a member of the Home from Hospital Team and they will arrange for someone to visit to discuss your queries.
