Subject: 10/02055/APP Colfield hotel development

Iain

Yesterday I received a telephone call from the applicant during which he objected to the level of roads infrastructure required to serve the proposed hotel development.

The applicant is seeking to reduce the level of roads infrastructure.

Transportation has undertaken an assessment to determine the level of infrastructure as detailed in our consultation response dated 24/03/2011.

If the applicant is objecting to the assessment undertaken by Transportation, then he is welcome to employ a Transportation consultant (a recognised professional) to prepare a Transportation Statement on his behalf. The Transportation Statement must be to a scope agreed with TMC Transportation and any traffic surveys undertaken must be to an approved scope and undertaken by a Moray Council approved supplier.

Kind Regards

Diane Anderson
