

Forres (River Findhorn & Pilmuir) Flood Alleviation Scheme The Bends in the River

OCTOBER 2013

How it works

The work we have done on the bends has created extra space for water by removing trees and excavating material.

Aerial photo taken on the 6 January 2013. Looking west

Aerial photo taken on the 21 August 2013. Looking N.E.

Now

We have removed 165,000 m³ of material, with another 20,000 m³ still to be removed.

If we took this material to Mosset Park Football ground we could raise the ground level about 30 m.

...and it works

During the spate event at the end of June this year the bends were flooded.

Photo taken on the 24 June 2013 at Bend 2.
