National	85	100	81	98	96	99	85	90

The percentage of children attending pre-school education in an area can exceed 100% due to double counting or children commuting from their home areas to attend pre-school provision in another local authority area.

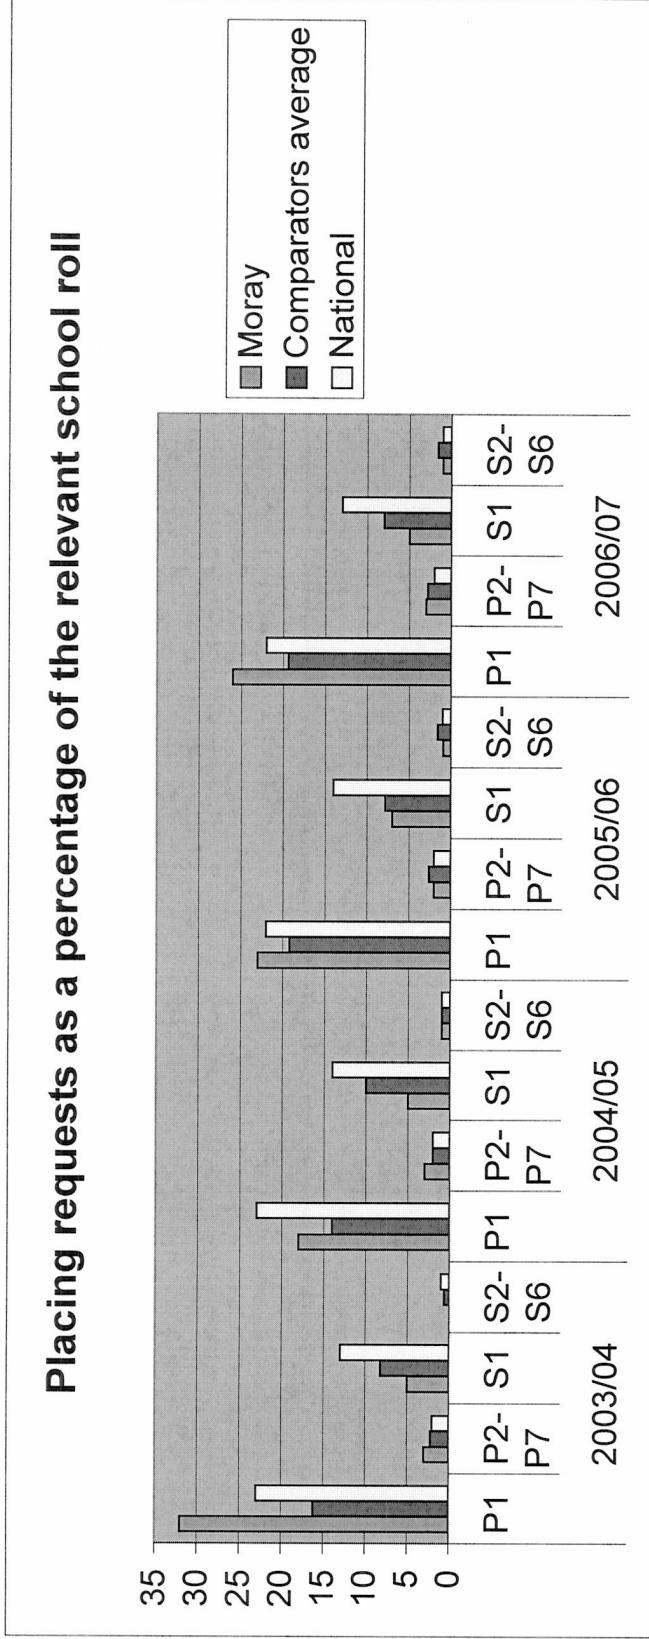

In 2006, the Scottish Executive used General Register for Scotland population estimates to calculate the percentage estimates of children for pre-school education. In previous years these estimates were calculated based on the number of children aged 3, 4 or 5 registered as at January in the given year. For this reason, results are not comparable to those published in in previous years.

Population figures used in these statistics are estimates, therefore the above should be interpreted with caution.

Placing requests as a percentage of the relevant stage roll, primary and secondary

	2003/04			2004/05			2005/06			2006/07
