

**REPORT TO: ECONOMIC DEVELOPMENT & INFRASTRUCTURE SERVICES COMMITTEE ON 17 JUNE 2008**

**SUBJECT: PROPOSED ROAD TRAFFIC ORDER – VARIOUS STREETS, ELGIN**

**BY: DIRECTOR OF ENVIRONMENTAL SERVICES**

**1. REASON FOR REPORT**

- 1.1 The Committee is asked to approve the promotion of a Traffic Regulation Order which will restrict parking on various streets in Elgin as detailed in **Appendix A** and shown in Plans **Appendix B** to this report.
- 1.2 This report is submitted to Committee in terms of the Council's Administrative Scheme relating to the making of Orders for the regulation and management of traffic.

**2. RECOMMENDATION**

- 2.1 **Committee is asked to approve the proposal to introduce a Traffic Regulation Order restricting parking around various streets in Elgin and instruct the Director of Environmental Services and the Chief Legal Officer to proceed with the statutory process.**

**3. BACKGROUND**

- 3.1 Since the last review of waiting restrictions in Elgin, implemented in 2005, requests have been received from members of the public, businesses and Grampian Police regarding a variety of locations where the introduction of waiting restrictions would assist traffic management in providing a safer environment for the movement of vehicles and pedestrians.
- 3.2 The Wards is currently a congested local distributor road with a mix of residential and industrial parking over its length. The level of parking combined with the existing barrier operated level crossing causes considerable congestion on the route particularly at peak times. The proposal will have the effect of removing parking over its length with the exception of a small area of restricted waiting adjacent to the residential properties who do not have off-street parking facilities. It is, however, recognised that this route may still have the potential to become congested if businesses continually load and unload over its length. If this is the case, it may be required to re-assess the restrictions at a future time with a view to introducing "Loading and Unloading" restrictions. However it is felt that the current proposal is an appropriate level of restriction in the first instance.

- 3.3 It is proposed to undertake minor alterations to the existing waiting restrictions on Seafield Street, Pluscarden Road, Rose Avenue and Gordon Street which will assist traffic management and existing accesses near the junctions.
- 3.4 West Park Road is the main access to West Park Court which is a residential home for elderly people. Roads officials have received numerous complaints that emergency vehicles cannot gain access due to indiscriminate parking. The proposals will maintain access at all times.
- 3.5 Moss Street is currently a strategic link to the town centre and is part of the regular town service bus route. The south section of Moss Street can be heavily parked on the west side over a distance of approximately 200 metres. This can cause severe problems when the service bus has committed to pass parked vehicles with no available pull-in area, vehicles regularly have no option but to mount the footway to allow the bus access through. To create pull-in areas within the parking will greatly reduce the current conflicts.
- 3.6 It is proposed to submit a further report at a later date to this Committee addressing parking on the radial routes and main distributor roads throughout Elgin.

#### 4. **SUMMARY OF IMPLICATIONS**

(a) **Corporate Development Plan/Community Plan/Service Improvement Plan**

The report encompasses the main aims of the Economic Development programme by maintaining suitable transport facilities and infrastructure as designated for their intended use.

(b) **Policy and Legal**

This proposal complies with the requirements of the Road Traffic Regulation Act 1984.

(c) **Resources (Financial, Risks, Staffing and Property)**

The cost of promoting the Traffic Regulation Order, providing signing and lining is estimated at £5,000 and will be funded from the **New Signs and Road Markings Capital budget 2008/09**.

(d) **Consultations**

Grampian Police have been involved in discussions with Roads Officers in preparation of this report. However any additional comments they may have will be tabled at the meeting.

Lorraine Paisey, Principal Accountant has been consulted and agrees with the financial implications.

Aileen Scott, Principal Solicitor (Commercial & Conveyancing) has been consulted and agrees with the contents of the report.

The Elected Members for Elgin City North and Elgin City South have been advised of the proposal and any comments they may have will be made at the meeting.

**5. CONCLUSION**

- 5.1 It is proposed to promote a Traffic Regulation Order which will have the effect of introducing waiting restrictions on various streets within Elgin (see attached schedules in Appendix A and plans Appendix B).**
